Disc Brake Caliper Mounting Bracket and Spacer Configurations

Use the chart below to identify the parts you intend to use, then reference the chart on the reverse side to determine the correct bracket and/or spacers. Consult your retailer for the proper rotor sizes for your bicycle.

Fork/Frame Mount

The mounting specification is determined by the fork/frame manufacturer and is not a reference to the rotor size. Consult your manufacturer for the proper mounting specification.

IS Mount

IS Bracket (IS)

Converts IS to Post Mount, required for all IS frames/forks.

Post Mount

Direct Mount (Direct)

No bracket or spacers needed.

Post Brackets (P)

Post Spacers (S)

CPS

Inline tabs

CPS washers are needed between caliper and mount.

Standard

Offset tabs

No CPS washers are needed between caliper and mount (unless otherwise specified).

⚠ WARNING - CRASH HAZARD

There must be 9-13 mm of mounting bolt thread engagement when mounting brake calipers to forks and frames either with or without brackets and/or spacers. Riding a bike with improper bolt engagement can allow the brakes to disengage from the bicycle, which can lead to a crash and serious injury or death to the rider.
